
Horizontal seed at the shear center
primary: $\lambda_1 = 21.5$ km
pairing: $\lambda_2 = 43$ km
sum
Initial w' [m s^{-1}]
Zonal distance [km]
Tanh shear + flow direction
Height from center [km]
Base wind [m s^{-1}]
Primary mode: four equal billows
Pairing subharmonic: two pairs
Combined initial vertical velocity
Height from shear center [km]
Zonal distance [km]
Initial vertical velocity [m s^{-1}]; arrows show perturbation velocity
